

My Heart Story

Did you know that 172,000 people are living with a heart condition in New Zealand?

That is one in twenty adults!

Everyone of you has at least a relative (family or friend) which has a heart condition.

If you are happy to share them with us, we want to hear those stories.

Write your story in the heart below and cut it out.

When you come and visit the Brave Hearts exhibition, there will be a panel where you can leave those stories.
